ReadyPhos™ Mg

LIQUID FOLIAR HIGH-EFFICIENCY PHOSPHORUS (0-29-5) WITH MAGNESIUM – DESIGNED FOR PHOTOSYNTHESIS, COLOR DEVELOPMENT, AND FRUIT BULKING.

ReadyPhos Mg is a foliar-applied orthophosphate combined with Mg designed to support photosynthetic activity, color development, and fruit or grain filling, regardless of soil pH.

ReadyPhos™ Mg

GUARANTEED ANALYSIS	APPLICATION RATE
0-29-5 4% Mg	0.5-3 qt/ac

ReadyPhos Mg is a foliar-applied orthophosphate combined with Mg designed to support photosynthetic activity, color development, and fruit or grain filling, regardless of soil pH.

P and Mg support chlorophyll formation and photosynthetic capacity, contributing to canopy development and function

Supports carbohydrate movement processes from leaves to developing fruits and grains during bulking stages

Foliar delivery bypasses soil fixation – both P and Mg reach the plant immediately regardless of soil pH

Foliar applications of P promote anthocyanin accumulation in fruits, including apples and grapes

CHELATION & PHOSPHATE PACKAGES

NUTRIENT USE EFFICIENCY PACKAGE (NUE)

Improves nutrient use efficiency by supplying plant-ready compounds that enhance metabolism, helping plants better utilize applied nutrients for stronger growth and performance.

HIGH EFFICIENCY PHOSPHATE PACKAGE

Provides immediately available phosphorus that can be absorbed by the plant through foliar applications and translocated within the plant to support growth, root development, and overall crop performance.

CROPS

Broadacre Crops (e.g., cereals, corn, soy etc.), Woody Perennials (e.g., pome fruit, stone fruit, citrus etc.), or Vegetables, Ornamentals and Aromatic Medicinal Plants (e.g., Brassicas, leafy vegetables, strawberry, tomato etc.).
