# FertiCare® MegaCoat

**A LIQUID COATING FOR GRANULAR FERTILIZER THAT PUTS FOUR MICRONUTRIENTS (ZN, MN, CU, B) PLUS MO ON EVERY GRANULE – APPLIED AT THE BLEND FACILITY, ELIMINATING THE SEGREGATION AND STREAKY RESPONSE OF DRY-BLENDED MICROS WITH NO EXTRA FIELD PASS.**

FertiCare MegaCoat is a multi-micronutrient liquid coating, placing five soluble nutrients (Zn, Mn, Cu, B, Mo) directly on fertilizer granules for consistent distribution throughout the field. The result is a convenient way to incorporate micronutrients into the fertility program without requiring an additional field pass.

# FertiCare MegaCoat

## GUARANTEED ANALYSIS

6.0% Zn
2.0% Mn
1.0% Cu
0.5% B
0.05% Mo

## APPLICATION RATE

1-4 qt/ton of blend

1-2 qt/ton urea
(applied at blending facility)

FertiCare MegaCoat is a multi-micronutrient liquid coating, placing five soluble nutrients (Zn, Mn, Cu, B, Mo) directly on fertilizer granules for consistent distribution throughout the field. The result is a convenient way to incorporate micronutrients into the fertility program without requiring an additional field pass.

- Coats every fertilizer granule for consistent micronutrient distribution throughout the fertilizer blend and across the field
- Formulated to keeps all five nutrients soluble and plant-available for maximum plant uptake
- Delivers five micronutrients (Zn, Mn, Cu, B, Mo) in a single coating application, simplifying micronutrient management
- No additional equipment, handling, or field operations required–the nutrition is already incorporated into the blend

## MIXING & HANDLING

Applied at blending facility to dry fertilizer granules (urea, MAP, or other dry fertilizer base). No additional field passes or grower equipment required.

## CROPS

Broadacre Crops (e.g., cereals, corn, soy etc.), Woody Perennials (e.g., pome fruit, stone fruit, citrus etc.), or Vegetables, Ornamentals and Aromatic Medicinal Plants (e.g., Brassicas, leafy vegetables, strawberry, tomato etc.).
