ReadyPhos™ Bloom

LIQUID FOLIAR HIGH-EFFICIENCY PHOSPHORUS (0-24-2) WITH CALCIUM, ZINC, AND BORON – FORMULATED SPECIFICALLY FOR BLOOM TIMING AND EARLY FRUIT DEVELOPMENT.

ReadyPhos Bloom is a foliar orthophosphate formulation with Zn and Ca designed for bloom and early fruit development stages, providing readily available P during peak demand periods.

ReadyPhos™ Bloom

GUARANTEED ANALYSIS	APPLICATION RATE
0-24-2 2.5% Ca 2% Zn 0.1% B	FOLIAR: 0.5-3 qt/ac

ReadyPhos Bloom is a foliar orthophosphate formulation with Zn and Ca designed for bloom and early fruit development stages, providing readily available P during peak demand periods.

- Delivers immediately available orthophosphate during growth stages when phosphorus demand is highest, including meristematic growth and bloom
- Ca and Zn are important for reproductive growth processes, including cell division, cell expansion, and cell wall development
- Foliar delivery bypasses soil fixation – phosphorus reaches the plant immediately, with no waiting on soil conditions
- Designed for application at fruit set and early fruit development across high-value crops

CHELATION & PHOSPHATE PACKAGES

NUTRIENT USE EFFICIENCY PACKAGE (NUE)

Improves nutrient use efficiency by supplying plant-ready compounds that enhance metabolism, helping plants better utilize applied nutrients for stronger growth and performance.

HIGH EFFICIENCY PHOSPHATE PACKAGE

Provides immediately available phosphorus that can be absorbed by the plant through foliar applications and translocated within the plant to support growth, root development, and overall crop performance.

CROPS

High-value specialty crops at bloom and during fruit set – almonds, grapes, tomatoes, tree fruit.
