Ful-Grow Gold 2X™

THE INDUSTRY-LEADING BASE FULVIC ACID WITH FLEXIBILITY ACROSS CONCENTRATIONS – DESIGNED FOR STACKING INTO ACIDIC TANK MIXES TO FACILITATE RAPID CROP UPTAKE.

Ful-Grow Gold 2X is the entry point in the Ful-Grow line – a clean 6% fulvic acid with no added potash or seaweed. It delivers the core fulvic acid mode of action across all agronomic crops and stacks cleanly with any program, including HumiK BIO.

Ful-Grow Gold 2X™

GUARANTEED ANALYSIS	APPLICATION RATE
6% Fulvic Acid 94% Organic Matter	FOLIAR & SOIL: 1-2 pints/ac

Ful-Grow Gold 2X is the entry point in the Ful-Grow line – a clean 6% fulvic acid with no added potash or seaweed. It delivers the core fulvic acid mode of action across all agronomic crops and stacks cleanly with any program, including HumiK BIO.

- Most sophisticated production process in the industry
- Nutrient delivery: chelates and transports nutrients directly into plant cells for faster uptake
- Growth support: promotes stronger root and shoot development and nutrient uptake
- Stress tolerance: helps plants withstand drought, salinity, and other environmental stresses
- pH versatility: remains effective across a wide range of soil and solution pH levels
- Flexible formulation: enables range of concentrations, helping you get the right product for each of your growers

BIOLOGICAL PACKAGES

FULVIC PACKAGE

Composition: Fulvic acid

Definition: Small, highly mobile molecules that carry nutrients into the plant and enhance uptake, metabolism, and stress tolerance.

MIXING & HANDLING

Gold 2X is acidic (~2.5-3.5 pH). Do not co-dissolve Gold 2X in the same solution as a HumiK (humic) product – the low pH can pull the humic out of solution, causing flocculation and sediment.

The information in this document has been provided in good faith. There are no warranties, expressed or implied, including any warranty of fitness or accuracy. The manufacturer assumes no liability if any issues arise. Trademarks within this document are of Humic Growth Solutions unless otherwise stated.
