KP Plus™

A SOLUBLE HIGH-P/K POWDER (1-50-33) IDEAL FOR LATE SEASON CORN AND SOYBEANS WITH A BUILT-IN STRESS PACKAGE THAT PRIMES PLANTS TO FIGHT ENVIRONMENTAL STRESS.

KP Plus is a soluble high-phosphorus, high-potassium (1-50-33) foliar powder designed to support crop development during periods of high nutrient demand and to reduce the effects of environmental stress.

Pep Up FX is a cost-effective biostimulant with multiple modes of action. It contains protein hydrolysate and micronutrient-support compounds, and can be applied with starter fertilizers, side-dressed with UAN, or added to foliar sprays to support root and shoot development, improve nutrient-use efficiency, and enhance crop response under stress conditions.

- Supports crop development by providing readily available phosphorus and potassium during periods of peak demand
- Helps maintain balanced crop nutrition in foliar programs where rapid nutrient access is required, by-passing periods of limited uptake due to unfavourable conditions
- Helps maintain crop growth during periods of environmental stress
- Fits into crop protection passes as a convenient way to supplement key macronutrients during critical growth windows (e.g., late-season corn and soy)

BIOLOGICAL PACKAGES

STRESS TOLERANCE PACKAGE

Composition: Proprietary anti-stress package

Definition: Primes plant defense systems like a vaccine to improve tolerance to environmental stress, helping protect yield under conditions like heat, drought, and herbicide stress.

CROPS

Broadacre Crops (e.g., cereals, corn, soy etc.), Woody Perennials (e.g., pome fruit, stone fruit, citrus etc.), or Vegetables, Ornamentals and Aromatic Medicinal Plants (e.g., Brassicas, leafy vegetables, strawberry, tomato etc.).
