Slingshot™ Dry

A POWDER CONSORTIUM OF 15 P/K-UNLOCKING, STRESS-MITIGATING, AND SOIL-BUILDING MICROBES DESIGNED TO BE IMPREGNATED ON MAP/DAP OR BLENDED INTO A LIQUID PROGRAM – UNLOCKING 15-20% MORE OF THE PHOSPHORUS AND POTASSIUM ALREADY IN YOUR SOIL BY PROTECTING NEW FERTILIZER FROM TIE-UP AND MINING FROM PAST APPLICATIONS.

Slingshot Dry is the dry powder format of Slingshot – the same phosphorus- and potassium-releasing biology, formulated for dry fertilizer impregnation.

Enhances P&K Program: Microbial biology protects nutrients from tying up, activates soil- and fertilizer-bound phosphorus and potassium, and mines historically locked nutrients – delivering 15-20% improvement in fertilizer availability.

Multiple Secondary Benefits: The full consortium improves soil health, builds root zone colonization, reduces abiotic stress, and supports organic matter mineralization across the growing season.

Fits Any Dry Fertilizer Program: Formulated to be blended in dry fertilizer applications with no additional pass required.
